

ABSTRACT

The present invention provides a safe and effective vaccine composition against *E. coli* O157:H7 shedding. An immunogenically active component *E. coli* O157:H7, an adjuvant such as a metabolizable oil, and a pharmacologically
5 acceptable carrier are formulated into an immunizing vaccine. The invention also provides a method for the prevention or amelioration of *E. coli* O157:H7 shedding.
